

Disc harrow TAL-K

TAL-K designed for effective stubble cultivation after harvest. Perfect for mixing slurry and crop residues.

Recommended for stony conditions. The -K machine has an integrated transport chassis, located in between disc and roller sections. This arrangement ensures good weight distribution, ensures even pressure on the ground, while reducing unwanted vibrations of the machine. 5-year warranty, maintenance free disc hubs are mounted to the robust leaf springs, allowing great disc travel & exceptional. The machine's standard equipment includes hydraulic depth adjustment. There are many options to choose from: various discs, tine screens, traffic lights, brake systems, oversize tires, different rollers and more.
